

Durga D/O Chandrasekaran

Singapore | durgabgf@gmail.com | [linkedin.com/in/durga-chandrasekaran](https://www.linkedin.com/in/durga-chandrasekaran)

EDUCATION

- Singapore Management University, Bachelor of Science in Computer Science (Artificial Intelligence)** Aug 2023 – Apr 2027
- **Relevant Coursework:** Data Analytics Foundation, Statistics for Data Science, Introduction to AI, Principles of Machine Learning, Data Structures & Algorithms, Web Application Development, Database Management,
 - **Scholarship:** BP Future Female Talent Scholar for Year 2025

TECHNICAL SKILLS

Programming & Querying: Python, SQL, Java
Data Analysis & Modeling: Excel VBA, Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, Feature Engineering
Machine Learning & AI: Supervised & Unsupervised Learning, Model Evaluation
Data Visualisation & BI: Tableau, QlikSense, Exploratory Data Analysis (EDA), Dashboard Development, Data Storytelling
Cloud & Databases: AWS, Azure, MySQL, PostgreSQL, MongoDB

WORK EXPERIENCE

- DBS Singapore** May 2026 – Present
- Business Intelligence Analyst Intern**
- Contributed to the development of a centralized Operational Risk dashboard, providing visibility into risk ratings across all DBS business units and locations.
 - Collaborated with Middle Office Technology and Data Science teams on data modeling to support enterprise-wide risk reporting.
 - Prepared and structured mock datasets for dashboard simulation and validation in Qlik Sense.
 - Supported the development of DBS GPT/Copilot agents to improve operational efficiency within the Operational Risk department.
 - **Tech Stack:** Qlik Sense, Excel VBA, Data Modeling, AI Agents (DBS GPT/Copilot)
- Asosiasi Zero Emisi Indonesia (AZEI)** Dec 2025 – Jan 2026
- Data Analyst Intern**
- Conducted large-scale desk research on farmers fishers in Indonesia, translating findings into structured datasets for analysis.
 - Co-developed a novel carbon readiness framework (first-of-its-kind) by defining measurable indicators for MRV participation, enabling systematic assessment of smallholder readiness across regions.
 - Built an interactive Tableau dashboard visualizing regional carbon readiness scores, identifying high-potential farmer and fisher clusters for integration into future MRV and carbon credit projects.
 - **Tech Stack:** Python, SQL, R, Tableau, Data Modeling

CO-CURRICULAR ACTIVITIES, LEADERSHIP, AND VOLUNTEER EXPERIENCES

- SMU The Mentoring Circle Odyssey 2026 – Sponsorship Executive** Sept 2025 – April 2026
- Spearheaded sponsorship strategy for SMU's flagship annual professional networking night with 800+ participants, building key corporate partnerships and securing resources that enabled a premier student-alumni industry engagement platform.
- Voices@SMU – Catalyst (Organising Committee & Advocate)** Aug 2025 – April 2026
- Championed student wellbeing by leading anti-bullying and anti-harassment advocacy efforts, and represented Voices@SMU in a mental-health dialogue with Minister for Education Desmond Lee to strengthen student-centric wellbeing policies.
- SMU Women in Tech – Honorary General Secretary** May 2025 – April 2026
- Led administrative coordination, internal documentation, and effective communication between executive committees.
 - Spearheaded stakeholder and corporate partner engagements to secure sponsorships, cultivating strong relationships and driving collaboration for networking events, workshops, and hackathons with companies like Accenture and UBS.
- Krsna's Free Meals – Volunteer** Jan 2025 – Present
- Prepared and distributed free vegetarian meals to migrant workers, helping strengthen community food support networks.

CLOUD AND DATA SCIENCE PROJECTS

- Anomaly Detection in Product Ratings — CS421 Principles of Machine Learning (Top 3, A+)**
- Developed a semi-supervised ensemble learning framework to detect anomalous user rating patterns in large-scale product review datasets.
 - Engineered and expanded feature sets (29 to 86 features) to improve model performance and anomaly detection accuracy.
 - Evaluated and combined multiple machine learning models including LightGBM, XGBoost, Random Forest, and Gradient Boosting.
 - **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, LightGBM, XGBoost, Ensemble Learning, Semi-Supervised Learning
- Scrooge CRM with AI Digital Twin Analysis — CS301 IT Solutions Architecture (In collaboration with UBS) (Scored A-)**
- Developed a cloud-native CRM system for wealth management, enabling secure client management and transaction monitoring.
 - Built an AI-powered Digital Twin analysis module that generated financial projections, health scores, and risk classifications from client transaction histories.
 - Architected microservices and cloud infrastructure using AWS services, with a focus on security, performance, and maintainability.
 - **Tech Stack:** AWS (Lambda, Fargate, Aurora PostgreSQL, Cognito, CloudFront), FastAPI, Docker, PostgreSQL
